hydraulic and
pneumatic
component repairs

Affordable repair solutions that work for your business.

We have solutions to save you time and money - every time.

AeroStar is an FAA Parts 145 Certified repair facility that specializes in offering affordable hydraulic and pneumatic component repairs to commercial and commuter airlines, OEMs, military, and MRO facilities.

AeroStar was established from a diverse aviation background and is a subsidiary of Star Aviation, an innovative engineering and manufacturing corporation, that was founded in 1999. Our founders have decades of combined engineering, manufacturing, and repair experience in all areas of aviation.

AeroStar is strategically located in Mobile, Alabama, at the Brookley Aeroplex, adjacent to ST Mobile Aerospace Engineering.

flexible solutions for your repair needs

In-House Repair

We utilize state-of-the-art equipment to repair and recertify your components.

Our other capabilities include welding, engineering, manufacturing, and machining.

Quality-FAA Certified

Our repairs are performed under the FAA and all parts are released with an FAA/EASA dual release certificate.

All of your repairs are certified and approved by the industry's highest standards and are in compliance with AS9100 standards.

Aircraft Platforms

- BOEING
- MCDONNELL DOUGLAS
- AIRBUS
- CRJ

HYDRAULICS

We service pumps, motors, servos, accumulators, and actuators.

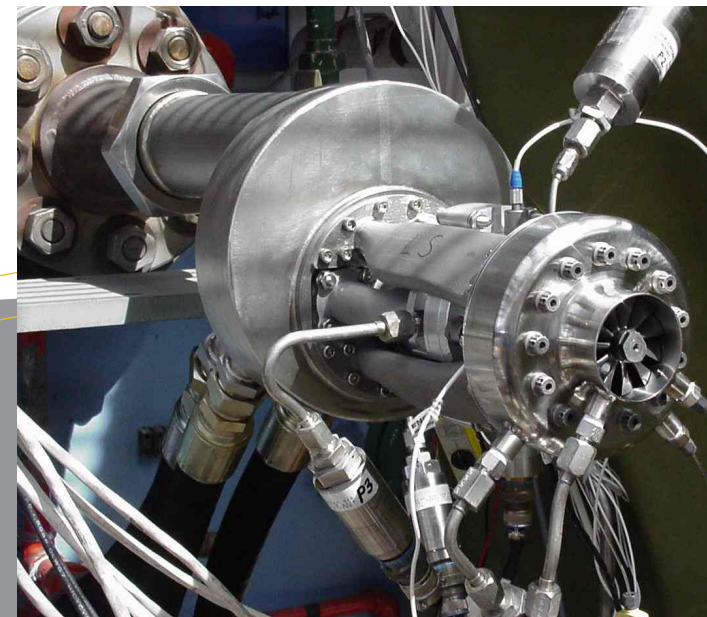

PNEUMATICS

We service high pressure bleed valves, flow control valves, outflow and safety valves, regulating valves, turbines, and temperature sensors.

ENGINEERING

We have highly experienced onsite engineers and DERs. This can save you time and money on minor repairs versus buying new equipment from the OEMs.

HOW CAN WE HELP YOU?

Contact our Sales team today at Sales@AeroStar.aero to find out how we can simplify the component repair process and provide you with exceptional service while saving you time and money.
